

Human Tiger Is Hanged, Thanks California Women

(By Associated Press.)
FOLSOM, Cal., July 12.—Jacob Oppenheimer, the "human tiger," was hanged at 10:30 o'clock this morning after seven years of fighting to escape the gallows.
He was sentenced under the law making death the penalty of a life term who attacks a fellow prisoner.
His dying request was to the women of California to keep up the fight for the abolishment of capital punishment.
"If the men only put their shoulder to the wheel as have the women, capital punishment, a relic of barbarism soon will be stamped out in this state," he declared just before mounting the gallows. "I want to thank all those, particularly women, who interested themselves in my behalf. I will not be the last to go before the practice is abolished, but I will be a martyr to the cause."
He walked to the gallows unfalteringly, and indifferent. He had been in prison 18 years. He killed two convicts, the first after he had been sentenced to 50 years for robbery, resulting in a life sentence. He had spent 14 years in solitary confinement. He listened to a phonograph for two hours last night and then slept soundly.

DIVIDING SPOILS OF WAR

ROUMANIA WANTS TO BE COUNT-
ED IN ON THE FINAL
CUT UP.

(By Associated Press.)
BUCHAREST, July 12.—Roumania has decided to notify Bulgaria that the Roumanian army would enter Bulgarian territory and Roumania take part in the discussion for final partition of territory formerly in European Turkey. Roumanian troops today occupied the Bulgarian city of Silistra unopposed.
BELGRADE, July 12.—Serbian military authorities regard the Servian-Greek campaign against the Bulgarians in Macedonia concluded since the recent defeat of the Bulgarians.
LONDON, July 12.—Greeks today captured Demir-Hissar, near Seres, by a brilliant victory over the Bulgarians who had been in possession since they won the town from the Turks. The Bulgarians abandoned arms, ammunition and provisions.

THINKS BROTHER WAS VICTIM OF FATAL AFFRAY

TONOPAH MAN TRYING TO ES-
TABLISH IDENTITY OF MAN
MURDERED AT CALIENTE.

Ed J. Robinson, foreman for Wittenberg thinks the William Robinson recently killed in Caliente was a brother of whom he has not heard for some years. His reasons for this conviction is that William was a machinist and the dead man was foreman of the roundhouse at Caliente, and came from Oregon. It was in Oregon where the brother William last resided.
Ed wired Dan Rannow, sheriff of Lincoln county, yesterday and received word to the effect that the deceased was in all likelihood the brother of the Tonopah Robinson.

LABOR AND LIFE.

(By Associated Press.)
SEATTLE, July 12.—The standards of labor and living was the principal subject at today's session of the National Conference of Charities and Correction.

Pleads Innocence On the Scaffold

By Associated Press
SAN QUENTIN, July 12.—Frank Bauerarts was hanged this morning for the murder of a year ago of two women near Riverside. Before the noose was adjusted he declared he was the victim of circumstances and innocent, but convicted because he was the last man seen in the company of the murdered women.
Bauerarts induced Mrs. Henrietta Guyot and Miss Julia Francois of Portland to finance a mining company in Riverside county. The bodies were found in shallow graves on the desert.

MERCHANTS ARE PROTECTED BY THE NEW LICENSE ORDER

An order designed to aid sheriffs in securing from business houses statements of the amount of business done by them each month has just been issued by the Nevada tax commission, over the signature of J. F. Shaughnessy, chairman, and is the first official order to be received by sheriffs relative to the manner in which business shall be conducted. Sheriffs have found business men reluctant to make a statement, under oath of the amount of business transacted, fearing that the data might fall into the hands of competitors and work to their disadvantage. The order places a seal of secrecy on the statements made by business men under these conditions and limits their publicity to authorized county officials or other persons interested.
The authority of the tax commission to make a ruling as to what shall or shall not constitute a public document on file with a county official has been questioned, and an opinion will be given by the district attorney on this point as soon as he has time to make an investigation. The order reads as follows:
"The principal obstacle to procuring the affidavit as to the amount of business done by applicants for license in accordance with section 3737 of the Revised Laws of Nevada, is the natural objection of those engaged in the same line of business to make a statement which might be used to their injury by their competitors.
"In the belief that it is in line with public policy that these affidavits should not become a public record, this commission, by virtue of powers conferred upon it by section 4 of chapter 134, Session Laws of 1913, hereby directs:
"That all affidavits made by any person, association or corporation as to the amount of business done, for the purpose of classifying licenses in accordance with section 3737, Revised Laws of Nevada, shall be accessible only to the sheriff, auditor or other duly elected county officials, and to the Nevada tax commission, or its authorized agents; that such affidavits shall be kept in the custody of the county auditor and that the same shall not constitute a public record.
"This order shall take effect immediately."—Reno Gazette.

RICHES CONTROL THE CHURCHES ASSERTS AN EDITOR

CANADIAN MAKES STRONG PLEA
FOR DIVORCE FROM
WEALTH.

(By Associated Press.)
LOS ANGELES, July 12.—Until the church re-establishes Christ's principles, social relations, human and industrial, justice must remain a mere figure of speech, asserted Dr. J. A. McDonald, editor of the Toronto, Ont., Globe, in the principal address to the Christian Endeavor meeting. He said the church is controlled by the well to do and is a futile instrument in the solution of problems created by the relations of labor and capital. The church is the conservator of vested interests, and worships the God of things as they are.

TONOPAH EAGLES ASKED TO SUBSCRIBE STOCK

AN EFFORT WILL BE MADE TO
BEGIN WORK ON NEW HOME
OF ORDER BY SEPTEMBER.

Members of Tonopah aerie of Eagles are in receipt of circulars urging them to subscribe to stock in the proposed new building at the corner of Everett and Main streets. If the returns are up to the expectations of the officers it is probable that the new home will be started by the first of September and occupied a month later. The building would cost about \$10,000 and be two stories high with stores on the ground floor.
The stock subscriptions will bear interest at the rate of eight per cent per annum subject to redemption when funds are in the treasury.

SIX ARE KILLED WHEN ENGINE HITS THEIR AUTO

ONE LITTLE GIRL ESCAPES BY
JUMPING JUST BEFORE
THE CRASH.

(By Associated Press.)
LOS ANGELES, July 12.—Carl Huffman, wife, three children and aunt, Miss Missouri Hoffman, were killed today when their automobile was struck by a locomotive of the Southern Pacific near San Gabriel mission.
One little daughter escaped by jumping just before the crash. They lived at Long Beach, and were visiting the mission.

SLIGHTLY BURNED BY EXPLOSION OF GASOLINE

WILLIAM MITCHELL SUSTAINS
INJURIES THAT WILL KEEP
HIM FROM WORK.

A singular accident happened Wednesday evening when William Mitchell was working around the MacNamara mine. While handling a can of gasoline it happened to fall and on striking his right leg exploded, enveloping his right side in flame. He succeeded in extinguishing the blaze but not before his right arm and leg were badly burned.
The only reason for the explosion is spontaneous combustion due to the intense heat.

CALIFORNIA SELECTED.

DENVER, July 12.—The University of California was selected for the national convention of 1915 of the Kappa Sigma Sorority.

Cinnabar Claims Gain 100 Per Cent Ore Property Bonded for Good Price

TWO FREIGHTERS FIGHT WAY THROUGH TEMPEST AND FLOOD TO CAMP OF WILLOW CREEK

Edward J. Robinson and Frank Abraham in charge of two of Wittenberg's big freighting outfits came in from Willow Creek last night bringing six tons of ore from the new camp. This was in the way of a cleanup of the old company and does not represent a regular shipment. A force of eleven men have been employed at the Wingfield purchase erecting cabins and a magazine, and when the teams left they were beginning on the mine. The round trip occupied 18 days, 14 days of which were consumed in going.
The trip was one of the worst in the experience of Robinson who has seen desert life in every phase and he thinks there is no chance of anyone beating the record established by himself and Abraham. Going, with two outfits consisting of one ten animal and a six animal team, each with a trailer and feed cart, they ran into a series of storms which stayed with them for four days. At times the sandy roads were so soft that the wagons sank axle deep and at a point half way between Tonopah and McKinney's tanks a bridge gave way and let one of the wagons through. This was repaired and the next jolt was when one of the wagons turned turtle and the heavy load had to be removed and packed again.
For three days and nights the rain never ceased and the condition of the roads may be guessed from the fact that the average progress was at the rate of seven miles a day. An incident of the trip was the disappearance of a horse which broke loose as the wagon went through the bridge. Abraham went in search of the animal and landed him after traveling 60 miles, making a round distance of 120 miles. One of the pleasures experienced by the pair of freighters was the joy of getting water. This involved going seven miles every night. The freight taken out on the trip aggregated 16 tons in addition to 5 tons of feed. The road has been placed in good shape and no further trouble is expected.
All that is required now is the installing of tanks for watering teams which will be done soon at a distance of about a mile and a half from the wagon road.
The Goodman lease on Willow Creek has a carload of ore saved and had begun sacking before the teams left camp. Another load will be taken out by the auto truck tomorrow.

COLDEST IN 600 YEARS

ITALY VISITED BY COLD STORMS
OF RAIN AND HAIL THAT
RUIN CROPS.

(By Associated Press.)
ROME, July 12.—A terrific rain and hail storm is raging throughout Italy and crops are ruined in many sections. This is the coldest July since 1312. It is almost freezing in the vicinity of Naples. Many villages are inundated on the gulf of Turin. Hurricanes at Cosenza were accompanied by earthquakes.

MORAN DENIES MOTION FOR PETERSON TRIAL

SILVER PEAK COMPANY MUST
PUT UP \$30,000 FOR
A STAY.

One of the largest, if not the largest bonds ever given in the local district court to stay execution of judgment in an action for damages growing out of personal injuries will be furnished by the Pittsburg Silver Peak Gold Mining company in the event of an appeal from Judge Moran's order denying a motion for a new trial in the case of Robert Peterson against the company is taken.
Twenty days were allowed the defendant to furnish a stay bond, the amount to be fixed later by Judge Moran. In case an appeal taken a bond double the amount of the judgment and costs of the action must be supplied. Peterson secured a \$29,000 judgment and costs will amount to approximately \$1000, bringing the bond up to \$30,000.—Reno Gazette.

WINDOW SMASHING ON KING'S VISIT

(By Associated Press.)
LIVERPOOL, July 12.—Sufragettes armed with pokers, started a window smashing demonstration on King George's visit today. Many were broken along the line of march. The police restored order before the king arrived.

TEMPERATURE REPORT.

Highest temperature yesterday, 89; a year ago, 87.
Lowest temperature last night, 60; a year ago, 65.

HIGHLAND MINE IS BONDED

JOHN K. TURNER, MINING EN-
GINEER, VISITS HIGHLAND
PROPERTY AT REPUBLIC.

Thomas D. Murphy, father of Goldfield, John K. Turner and W. P. Bond, of Goldfield, left Tonopah this morning for the new camp of Republic, 55 miles northwest of camp, for the purpose of making a final examination of the Highland claims which were the foundation of the rush to that district last winter. The ground is owned by Dick Highland who has done a lot of development work that shows the value of the property. The vein has been opened for a distance of 3000 feet by trenching and there are several shafts ranging from 75 to 200 feet deep which enable visitors to make a thorough examination. Values run in gold and silver, but for the present, the prospective buyers are not saying anything about their assays. Highland has surveyed 140 acres.
Fletcher and Gallagher have 500 sacks which they are shipping from the Rosalie adjoining. Careful sampling of this lot of ore gives values of \$250 but the shipment was carefully sorted to avoid the waste of sending out rock that would not stand the heavy expense of shipping.
If the examination today does not develop some untoward circumstance a bond will be taken on the property and the first payment made.

COBWEB SALOON UNDER THE NEW MANAGEMENT.

The Cobweb saloon has been taken over by John F. Manion, Del Hammond and Nick Abelman, all of whom have been in business in Southern Nevada for the last seven years and know how to cater to the trade in a bustling mining camp. Manion is well known, especially as the manager of the Tonopah club when it was in its prime five years ago. Since then he has been manager for Charles Evans at the Bank saloon, Goldfield. Del Hammond has been connected with the Bank for the last five years and is one of the most popular men behind the bar. Nick Abelman has been in the game since the days when the Gans-Nelson fight enticed him to the desert and opened the first house of comfort in Antelope.

Surface Ore Runs 10 to 25 Per Cent and at a Depth of 10 Feet the Pure Quill Is In Evidence--Tonopah Men Are In Right With Rich Showings

(Special to the Bonanza.)
MINA, July 12.—The cinnabar find east of here is growing more sensational with every foot of work performed, and already sufficient showing has been made to base the claim that it is the greatest mineral find ever made in the world's history. The writer has just returned from a four days stay in camp and in the last week prospects and ore showings have improved over 100 per cent.
The latest sensational strike was made yesterday on the property owned by W. W. Booth, W. J. Douglass, Al Wardle and F. H. Bruce. Six feet of ore has been opened up right at the surface that will run in mercury from 10 to 25 per cent.
On the property of Adolph Maier of Tonopah, and associates, a big ledge has been uncovered at the surface that runs about \$50 a ton in quicksilver. Very little work has been done on either of the properties, but the ledges are strong and well defined and promise greater richness with depth. Good ore has also been uncovered at the surface on the property of F. R. Red of Rawhide and Dr. C. F. Pache of Hawthorne.
Pepper and Keough yesterday took out a force of men to the original strike. They are showing up some great ore. Pepper and Keough are establishing a camp and will drive a tunnel to cut the ore at a depth of about 800 feet. As soon as development work has progressed sufficiently a plant for reducing the mineral will be installed and the ore treated on the ground.
The strike on the Summerfield, Shepherd and Buck property is getting richer with depth. The bottom of the shaft has reached a depth of ten feet and shows five and a half feet of ore that is almost the pure article. Experts who have recently visited the camp pronounce it one of the greatest showings of high grade ore they have seen. The property has been bonded to parties at a handsome figure.
Every indication now points to the district becoming one of the greatest ever discovered in Nevada. New people are coming in daily. Tonopah people have certainly got in good on the new find.
Protected the Raincoat.
Last Sunday when Booth, Wardle and Bruce came out from Tonopah to go to the camp they brought their bedding along, Nevada style. Leaving Mina for the camp via Joslin Jungberg's two-horse lightning express, they were caught in a heavy rain. When they got up in the mountains they were greeted by a heavy electrical storm and a down-pour of rain, resembling a cloudburst. When camp was reached Mr. Bruce unrolled his blankets, as the rain had ceased to fall, and extracted a heavy rubber raincoat that was perfectly dry, which is more than could be said of the owner.
Humming Birds Nest.
One of the strangest incidents of bird life is to be seen at camp Shepherd. A little humming bird had built its nest in a juniper tree near a cliff, and over some rocks that formed a natural fire place. It was sitting upon its eggs when camp was established, but with all the men around and the bustle and noise consequent to establishing a camp, putting up tents, it kept strictly on the job, showing no fear whatever of the men. As the branch on which it had built its nest hung out over the fire some of the boys bent the limb back to the tree and wired it to prevent the blaze from destroying its little home. Even while this was going on the mother bird never left her nest.
Heavy timber, splendid springs of water and myriads of the most beautiful and brilliant hued flowers make the new district one of the real beauty spots of the state.

DRILL TAKEN UP AT DARMS MINE TO SINK SHAFT

PRESENCE OF COAL VEIN PROV-
EN AND SHAFT WILL BE
SENT DOWN AT ONCE.

Hermann Darms, president of the Darms Coal Mining company, came in this morning from Napa, Calif., where he has been enjoying a brief vacation. He stopped on the way at Condale and was greatly pleased to learn that the drill had gone through two good bodies of coal. This was all he desired to know as it will guide him in the future explorations.
The next step will be to drop the shaft down to the lower zone where the best coal lies and this will be done as soon as the development has been financed. Mr. Darms has been urged to list his stock on the San Francisco board but he has not decided whether he will do this or not. With proper facilities for sinking the mine should be in shape for production next winter.

NEW ORDINANCES ARE IN FORCE FROM TODAY

REGULATIONS FOR AUTOMOBILE
LIGHTS AND THE STOR-
ING OF GASOLINE.

Chief of Police Evans calls attention to the new ordinances which have become effective since they have been advertised the proper period in the Bonanza. These ordinances prescribe that owners of motor cars must at all times after dark display head and tail lights when their machines re on the road. This rule also applies to motorcycles.
Fire limits also have been established prohibiting the storage of gasoline within the area bounded by Cross avenue and the depot on North and South and Mineral and University streets.

Panic In House Causes a Panic

LONDON, July 12.—The report of a pistol fired in the strangers' gallery of the house of commons during the session today accompanied by a yell of "justice for women" caused a panic among members. Simultaneously there was a shower of pamphlets on "Votes for Women." Two were argued when it was discovered that the pistol was a toy.

WEALTH BURIED IN CEL- LAR TAKES TO FLIGHT

Mrs. Plevel, who runs a boarding house at McGill, was robbed of \$1500 in cash which she had buried in the cellar for safe keeping.
During the last strike Mrs. Plevel drew her savings from the bank, and buried the currency in her cellar; but yesterday discovered the money was gone. She accuses Joe Zupovich, a man she has known for some time, of the theft.
